

BIOPROTECT™
PRODUCTS

Ready To Use Residual Surface Protection

- **DURABLE, LONG-TERM ANTIMICROBIAL SURFACE PROTECTION**

BIOPROTECT™ RTU creates a durable and protective shield on porous and non-porous surfaces, providing long-term surface defense for up to 90 days against odor and stain causing bacteria, mold, mildew, fungi and algae.

- **CAN BE APPLIED TO FOOD & NON-FOOD CONTACT SURFACES**

BIOPROTECT™ RTU is a water-based formulation for use as an antimicrobial preservative under EPA and FDA regulations to preserve food and non-food surfaces.

- **READY-TO-USE**

BIOPROTECT™ RTU is ready to use, right out of the bottle. No mixing or dilution needed.

- **PATENTED, REGISTERED AND EXTENSIVELY TESTED**

Extensive laboratory testing has established that the BIOPROTECT™ RTU antimicrobial technology provides long-term protection against odor and stain causing bacteria, mold, mildew, fungi, algae for up to 90 days.

- **EASY APPLICATION**

Applications can be done by electrostatic sprayers, foggers, or pump spray bottles. Just spray or fog BIOPROTECT™ RTU onto a surface, no rinse required.

Product Details

- EPA Registration #87583-3
- Remains active on porous and non-porous surfaces for up to 90 days without reapplication
- Ready to use, water-based antimicrobial surface protectant
- For use as an antimicrobial preservative under EPA and FDA regulations to preserve food and non-food contact surfaces
- Does not contain bleach and is non-corrosive

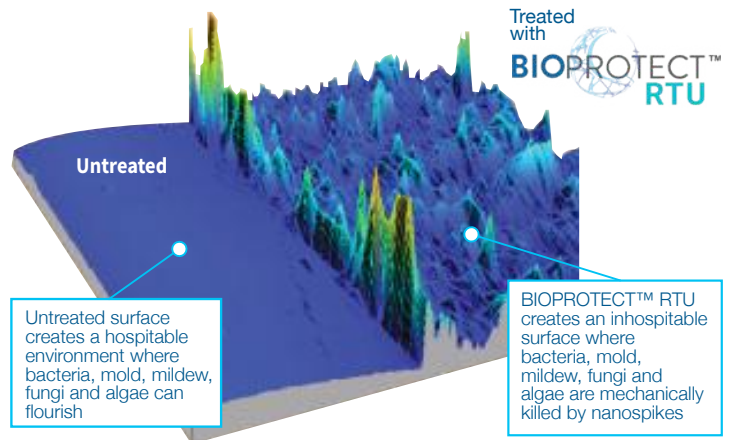

How It Works

BIOPROTECT™ RTU, which is approved as a preservative for food and non-food contact surfaces by the EPA and FDA, bonds to the surface it's applied to, creating a barrier of antimicrobial defenses that inhibit the growth of odor and stain causing bacteria, mold, mildew, fungi and algae for up to 90 days.

BIOPROTECT™ RTU can be used on porous and non-porous surfaces, food and non-food contact surfaces, appliances, equipment and utensils used in preparing and processing of food products for human and animal consumption.

WHEN APPLIED TO POROUS AND NON-POROUS SURFACES

1. BIOPROTECT™ RTU forms a covalent bond with the substrate and creates a microbiostatic antimicrobial coating that protects a surface for up to 90 days.
2. The coating forms a layer of spikes (self-assembling monolayer), each of which carries a positive charge that attracts the negatively charged germ.
3. Once attracted, the molecular spikes pierce the cell and rupture its cell membrane, thus causing the pathogen or microorganism to die.

HYDRATING HAND SANITIZER

Taking Extended Hand Protection to a Whole New Level

PROTECTS FOR UP TO 6 HOURS

Hydrating Defense Specifically Designed for the Human Hand

- **KILLS 99.99% OF GERMS AND BACTERIA ON HANDS**

BIOPROTECT™ Hydrating Hand Sanitizer is an FDA registered hand sanitizer that kills 99.99% of germs and bacteria on your hands.

- **HYDRATES AS IT PROTECTS**

BIOPROTECT™ Hydrating Hand Sanitizer moisturizes and hydrates hands as it kills germs and bacteria. Infused with soothing aloe vera, fragrance and dye-free, paraben and sulfate-free.

- **LASTING EFFECTIVENESS**

Provides up to 6 hours of extended hand protection. Repeated application increases effectiveness.

- **EASY TO APPLY**

Apply 2 to 3 pumps of BIOPROTECT™ Hydrating Hand Sanitizer each use. Work thoroughly onto hands and allow to dry without wiping. Reapply every 6 hours.

Product Details

- Kills 99.99% of germs and bacteria on hands
- Foaming Application: alcohol-free, fragrance-free, dye-free, paraben & sulfate-free
- Moisturizes using aloe vera and glycerin
- Formulated and blended in the USA

How It Works

The most common problem with other hand sanitizers is the need to frequently reapply. **BIOPROTECT™ Hydrating Hand Sanitizer** offers extended protection for up to 6 hours.
